PETFOOD BY NUTRITIONISTS WITH
ONLY QUALITY INGREDIENTS

YDOLO

your dog only lives once

Pure quality without compromise

Based on this philosophy, we always look for the most nutritious raw materials and healthiest production methods. To this end, we work together with the best orthomolecular and holistic dog nutritionists in Belgium and the Netherlands to create products that ensure a long and healthy life for our four legged friend(s).

Dogs never save on their unconditional love for us, so we don't save on quality for our best friend(s).

If you choose our products, you can always do so with peace of mind knowing that they contain no grains, no artificial colors and flavors or preservatives. Only 100% natural and highly digestible ingredients from Europe.

WWW.YDOLO.EU

About our food

We have selected and tested all our ingredients specifically and with the utmost attention. Anything with drawbacks, that hasn't been researched enough or that isn't natural for the digestive system, has been banned from our formulas.

Only ingredients that all ensure a healthy and strong dog. Extra support for joints, intestines, kidneys, ... , for a long, happy and healthy life. Each ingredient has an added value, not one is used as a filler.

**A uniquely soft and
incomparably delicious kibble.**

benefits

HEALTHY & PURE

75%

FRESH MEAT or **FRESH FISH**, all sourced from within a radius of 100km from the production. No over-processed “meat meal” or “... proteins”

0%

Grains, gluten, soy, peas, beet pulp, glycerin, meat meal, dairy products, Bha/bht, tapioca, gmos, msg, potato, artificial colours, fragrances, flavours, ...

78°C

Is the **maximum temperature throughout the process**, the fresh meat retains all its **vitamins, minerals and taste**.

Full support

All organs and the immune system are taken care of and helped in the best possible way by specifically chosen ingredients with proven properties.

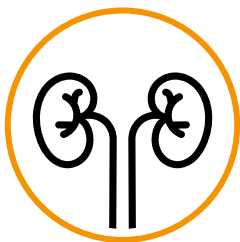

JOINTS & MOBILITY

Chondroitin, glucosamine, msm all support healthy cartilage, alfalfa helps relieve arthritis, green lipped mussel is a source of natural glucosamine.

GUT & DIGESTION

Chicory root is a source of inulin FOS, Artichoke supports healthy digestion (MOS), sweet potato, bananas, apples, ... are full of fiber and natural prebiotics.

LIVER & KIDNEYS

Alfalfa can help as a diuretic and to treat overly acidic urine, which can prevent bladder irritation and kidney stone formation. Cranberry prevents the bad bacteria from attaching themselves here and causes inflammation.

SKIN & COAT

Trout oil is a source of omega fatty acids with better values and proportions than salmon oil, blueberries are packed with antioxidants that prevent aging, olive oil improves cell health and contains essential fatty acids that help prevent a dull coat.

Immunity boost

We take it one step further in our **WILD FISH & DUCK** recipes

EXTRA ADDITIONS OF DANDELION, GINGER, TURMERIC, CORDYCEPS, SHIITAKE

1 Anti-inflammatory properties:

They contain bioactive compounds with strong anti-inflammatory properties. These properties help reduce inflammation associated with allergic reactions, reducing symptoms such as swelling.

2 Antioxidant activity:

All are rich in antioxidants that neutralize free radicals and reduce inflammation. This helps protect cells from damage caused by oxidative stress and strengthens the immune system to better deal with allergens.

3 Histamine Regulation:

These herbs and mushrooms can help regulate the release of histamine, a compound involved in allergic reactions. By regulating histamines, they can help prevent symptoms of allergies such as watery eyes, itching, and inflammation.

4 Immunomodulatory properties:

Both mushrooms contain compounds that help regulate the immune system, such as beta glucans, polysaccharides, and peptides. These substances can improve the activity of immune cells and regulate inflammatory responses, which helps the immune system function better.

5 Improving overall health:

Cordyceps and shiitake contain nutrients that promote overall health, including vitamins, minerals, amino acids, and essential fatty acids. A healthy body is better able to maintain a strong immune system and fight allergic reactions.

Unique production process

We went in search of the healthiest process currently available. Our soft kibble is steamed according to a very special production process. Before pressing at a low temperature (+ -70°C), the fresh meat is cooked very slowly together with the other ingredients in its own juices at a low temperature of max 78°C, just as if we were cooking at home. So here we are doing “slow cooking”.

SUPER TASTY

This method of production allows us to preserve the meat juice , which disappears with other methods. The softer kibble also has much more flavor that is unparalleled. Out of all the “blind” tests, the kibble is chosen first. The smell is also unique and will make your dog’s mouth water.

LESS STOOL

This very natural preparation method reduces the burden on the gastrointestinal tract and can be digested optimally and easily . No sagging bowel movements or flatulence and also less stool than with extruded kibble.

HEALTHIER & MORE NUTRITIOUS

By cooking the fresh meat at this low temperature, the structure of the proteins remains much better intact. This also allows us to retain many more vitamins, minerals and nutrients.

YDOLO Healthy & Pure Puppy

75% fresh meat

Grainfree

Hypoallergenic

No meat meal

No chicken

COMPOSITION

75% Fresh Meat & Fresh Fish (Iberico + anchovies + sardines), sweet potato, banana, artichoke, chicory, alfalfa, apples, broccoli, blueberries, Brussels sprouts, green-lipped mussel, rosemary, thyme, oregano, trout oil, milk thistle, spirulina, olive oil, yucca, glucosamine (1000mg/kg), chondroitin (850mg/kg), MSM (650mg/kg).
